PROXION'26

CODE. CREATE. COMPETE.

CODE RUSH

RULE BOOK

08-10 MAY 2026

ABOUT THE EVENT

Code Rush is a high-speed individual coding sprint. Participants face six algorithmic problems of increasing difficulty, designed to test speed, precision, and fundamental problem-solving skills. The entire round simulates a real-time system breach – every second counts.

REQUIREMENTS

- Personal laptop or desktop
- Stable internet connection
- Active Codeforces account (free registration)
- Discord (for event communication and announcements)
- Any of the allowed programming languages: C++17, Python 3.11, or Java 17

MODULE FORMAT

- Mode: Individual
- Duration: 60 minutes
- Platform: Private Codeforces group contest
- All six problems are visible from the start
- No partial scoring – a solution either passes all test cases or it does not

SCORING SYSTEM

Problems are ranked by the number of problems solved (higher is better).

Ties are broken by:

- Lower total penalty time (sum of minutes to each solved problem + 10 minutes per incorrect submission on a solved problem)
- Earlier time of last accepted solution
- If still tied, the rank is shared

RULES & REGULATIONS

- All code must be written during the contest; using pre-written templates or copied solutions is prohibited
- Communication with other participants about the problems is not allowed
- AI tools (ChatGPT, Copilot, Gemini, etc.) are strictly forbidden
- Only official language documentation (cppreference, docs.python.org, etc.) and personal paper notes may be used
- The contest platform automatically enforces time limits and submission rules; organizers monitor submissions in real time

PENALTIES & TIE-BREAKERS

- Each incorrect submission on a problem that is later solved adds 10 minutes to the total penalty
- Unsolved problems do not add any penalty
- Tie-breaker: after penalty, the earliest last accepted solution decides
- Disqualification for: using AI tools, code sharing, multiple accounts, or accessing forbidden resources

RECOGNITION

- Code Rush Champion – 1st place
- First Blood Badge – first correct submission on any problem (announced live)
